Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Crued oil price prediction is a challenging task in oil producing countries.
2.	Idea / Solution description	To studty the similarity in the extent of impact of changing in crude oil prices on key economic parameters in the Indian cotext.
3.	Novelty / Uniqueness	Crude oil price prediction that artibical neural networks(ANN) with learning ability are systems in which each neural networks is linked to each other.
4.	Social Impact / Customer Satisfaction	Oil price forecasting has become & more important for economic agents in Covid -19 period.
5.	Business Model (Revenue Model)	We can on focus exporters in exporting countries genarate revenue by selling.
6.	Scalability of the Solution	Using different data sets our model can also be applied to forecasting other financial and economic indicators in future.
